Application Workspace Agent Logging

Last Modified on 2026-11-02

Log file locations

Agent

Application Workspace Agent Log Location:

Platform	Path
Windows	%ProgramData%\Liquit\Agent\Logs\Agent.log
macOS	/Library/Logs/com.liquit.Agent/Agent.log

UserHost

The UserHost process is run per user to execute user actions initiated by the agent service.

UserHost Process Log Location:

Platform	Path
Windows	%localappdata%\Liquit\UserHost\Logs\UserHost.log
macOS	/Users/xxx/Library/Logs/com.liquit.Agent/UserHost.log

Enable Debug Logging

When you enable debug logging detailed information about actions, including all web activity, displays in the log file.

To enable logging in the `Agent.json` file, change the log level from "Info" to “Debug” and restart the device.

```
"log":{
   "level": "Debug"
}
```

TIP: After restart, check the `Agent.log` and `UserHost.log` files to verify the new log level.

Agent.json Location:

Platform	Path
Windows	%ProgramData%\Liquit\Agent\Agent.json
macOS	/Library/Application Support/com.liquit.Agent/Agent.json
