Recast

Application Workspace 4.3.4420

Last Modified on 2026-11-13

Release Date: November 6, 2026

Application Workspace Version 4.3.4420.6247 includes a critical security fix. Upgrading is strongly recommended.

You can download this release from Application Workspace Downloads.

Security Fix

Validates sign-in callbacks so that Application Workspace only sends tokens to sites that the zone trusts.

NOTE: Cross-Origin Resource Sharing (CORS) is disabled by default for new Application Workspace 4.3 installations. You must enable the feature to apply this security fix. For instructions, see Security Settings.
