

# Enable/Disable Right Click Tools Update Notifications

Last Modified on 08.29.23

By default, your Right Click tools will display a notification whenever a new software version is released. You can view or change your notification settings in either the Recast Management Server interface or the Configure Recast Console Extension application.

To change your notification settings in Recast Management Server:

1. Open your Recast Management Server and navigate to **Administration > Settings**.
2. Set **DisplayUpdatePromptsToUsers** to 'true' or 'false' depending on whether you want to be notified when Recast Software releases a software update that includes new features and bug fixes.
3. Set **DisplayBugfixUpdatePromptsToUsers** to 'true' or 'false' depending on whether you want to be notified when Recast Software releases a software update that includes only bug fixes.

To change your notification settings in Configure Recast Console Extension:

1. Access the Configure Recast Console Extension from your Configuration Manager console by navigating to the Recast Software node.
2. In the 'How Can We Help?' section, click **Configure Recast**.
3. On the **General** tab, enable or disable **Automatically Check For Updates**.
4. Click **Save** to apply your changes.
