

Deploy Applications

Last Modified on 04.23.24

To deploy an application:

1. Navigate to the **Applications** page in your Recast Management Server.
2. Search for the application to deploy.
3. Click the **Deploy** button to the right of the application to deploy.

Applications 						
<input type="text" value="videolan"/>						
Vendor	Application	Date Added 	Deployment processes	Version Currently Installed	Version to be Deployed	Actions
 Videolan	VLC Media Player (Finnish) (x86)	11/6/2023	0		v3.0.20	Deploy
 Videolan	VLC Media Player (Finnish) (x64)	11/6/2023	0		v3.0.20	Deploy
 Videolan	VLC Media player (English) (x86)	11/6/2023	0		v3.0.20	Deploy
 Videolan	VLC Media Player (English) (x64)	11/6/2023	1		v3.0.20	Deploy

If the application is already included in an existing deployment process, the [Reimport Application](#) side panel will open.

If the application is not already included in a deployment process, clicking **Deploy** will open a panel where you can add a deployment process.

To add a deployment process:

1. In the **Select Application(s)** side panel, search for and select the applications to deploy with this deployment process. Click **Next**.
2. Name the deployment process and click **Next**.
3. From the list of collections drawn from your Configuration Manager environment, select the device or user collection to which you'll deploy the applications. Click **Save & Close**.
4. On the **Deployment Process Details** page that opens next, configure the duration of the deployment process. You can [deploy the application to more collections](#) and/or [add a delay](#) prior to a deployment step. When done, click **Save**.
