

Reimport Applications

Last Modified on 04.23.24

If a deployment process is deleted and recreated, or an application is accidentally deleted from your Configuration Manager console, you can reimport an application version without the need to wait until a new version is published in the Application Manager catalog. Reimporting an application removes it, and any deployments that include it, from Configuration Manager. The application and deployments are then recreated using the current Application Manager deployment process settings.

You can reimport applications from either the **Applications** page or the **Deployment Process Details** page in your Recast Management Server.

To reimport an application:

1. On the **Applications** page, click the **Deploy** button to the right of the application to reimport.

Applications

Vendor	Application	Date Added	Deployment processes	Version Currently Installed	Version to be Deployed	Actions
Videolan	VLC Media Player (Finnish) (x86)	11/6/2023	0		v3.0.20	Deploy
Videolan	VLC Media Player (Finnish) (x64)	11/6/2023	0		v3.0.20	Deploy
Videolan	VLC Media player (English) (x86)	11/6/2023	0		v3.0.20	Deploy
Videolan	VLC Media Player (English) (x64)	11/6/2023	1		v3.0.20	Deploy

TIP: You can also find the **Reimport Applications** option on the **Deployment Process Details** page by clicking the vertical ellipsis.

Deployment Process Details

Run

1 application [edit](#)

Videolan VLC Media Player (English) (x64) en-US x64

Deployment Process	Duration	Release date	+1 Days	+2 Days	+3 Days	+4 Days	+5 Days	+6 Days
▼ Videolan VLC Media Player (English) (x64)	Total: 9 Days							
1. Deploy to Co-management Eligible Devices	Immediately							
Delay 4 days	4 Days							
2. Deploy to All Desktop and Server Clients	5 Days							

- Reimport Applications
- Delete Deployment Process

2. In the **Reimport Application** side panel that opens, choose whether to redownload the application version to the Application Manager catalog.

3. Click **Reimport Application(s)**.

Reimport Application

1 application

VidoeLAN VLC Media Player (English) (x64) en-US X64

Reimporting the application(s) removes the existing applications and deployment(s) from the Configuration Manager. Then the application(s) and deployment(s) are recreated using the current deployment process configuration.

Warning: Performing this action will erase any manual changes you've made, including any deployment(s) created in Configuration Manager.

Would you also like to force redownload of the application installation media from Recast Application Catalog?
