

Insufficient Recast Permissions

Last Modified on 08.13.25

An '**Insufficient Recast Permissions**' error indicates that Right Click Tools has determined that the user doesn't have permissions to run the action that they are trying to run.

- If a user has insufficient Recast permissions to run an action, the tool will be grayed out.
- If a user has the required Recast permissions, but insufficient Microsoft permissions, to run an action, the tool will appear to be available (not grayed out) but the action won't run successfully.

KNOWN ISSUE: (July 2025) Some customers are currently experiencing an issue where a user with the required admin permissions still gets an '**Insufficient Recast Permissions**' error. This issue will be resolved in the August 2025 release. In the meantime, contact [Recast Support](#) for assistance.

Probable Cause

There are two reasons this can happen:

- **Limited permissions:** A user's access to Right Click Tools actions is limited by their Recast permissions and/or their Microsoft permissions. Recast permissions will not override Microsoft permissions.
- **Trial Expiry:** The Right Click Tools trial license has expired, removing access to the Enterprise features of Right Click Tools.

Troubleshooting Steps

- Check the required permissions for a Right Click Tools action on the [Tools](#) page for that action.
- View and edit Recast user permissions on the Recast Management Server [Permissions](#) page.

NOTE: Right Click Tools must be connected to Recast Management Server to grant users or groups role-based Recast permissions.
