Right Click Tools Missing After Install

Last Modified on 2026-10-05

Potential Cause

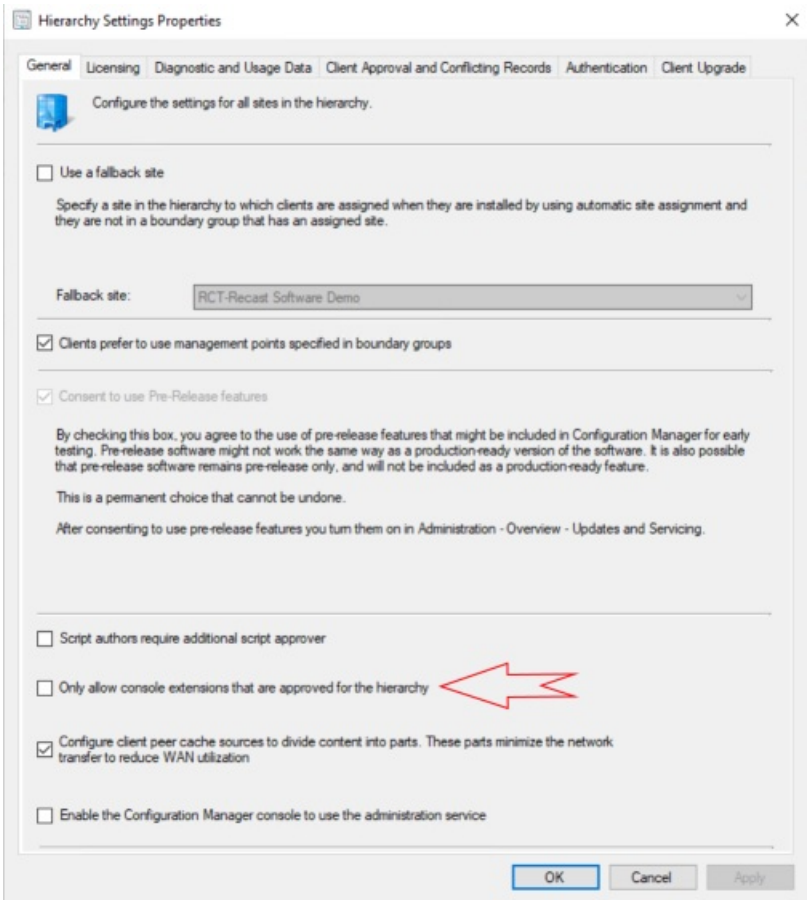

If Right Click Tools do not appear in the Configuration Manager console after installation, this may be happening because Microsoft has changed the way that Console Extensions are allowed to display within the MECM console. In the past, any installed extension was allowed to display. That behavior has since changed. Currently, legacy console extensions must be configured to display their extensions.

Resolution

1. In your Configuration Manager console, go to **Administration** > **Site Configuration** > **Sites**.

2. Select **Hierarchy Settings** from the ribbon.

3. On the **General** tab, deselect **Only allow console extensions that are approved for the hierarchy.**

NOTE: If Right Click Tools still doesn't appear, try enabling the **Only allow console extensions that are approved for the hierarchy** option, relaunching the ConfigMgr console, then deselecting the option, and relaunching the console again.
