Run Actions as a Service Account with Recast Proxy

Once you've created a proxy route, you can direct Recast actions to it.

By default, new routes appear at the bottom of the table on the **Routes** page. To make actions run using a Recast Proxy route that is lower in the list, you must move that route above the Console Extension route in the table, as the first route to be successfully matched will be used.

To reorder routes, drag and drop them into the desired order. When you're done reordering the proxy route list, click **Save** to finalize the changes.
