Send Unsent State Messages

Last Modified on 12.22.25

The **Send Unsent State Messages** tool sends state messages cached on the ConfigMgr Client to the ConfigMgr Server.

To run the tool:

1. Right-click on a device.

2. Select **Right Click Tools** > **Client Actions** > **Send Unsent State Messages**.

The window that opens displays progress and successful completion.

Recast Permissions

Plugin	Permissions
ConfigMgrClient	SendUnsentStateMessages

Microsoft Permissions

- Requires that the target device has a working ConfigMgr client installed.
- Requires that the user running the ConfigMgr console has administrative access to the remote device.
- Remote WMI ports must be allowed through the firewall.
- If the 'Ping Computer Before Running Tools' option is set, ICMP Echo must be allowed through the firewall.
- If using a Recast Management Server with a proxy, the service account will need administrator permissions on the remote device.

> One way around some of the permissions requirements and firewall rules is installing aRecast Agent.
