

## Software Metering Usage Report Cycle

Last Modified on 12.22.25

The **Software Metering Usage Report Cycle** launches a Configuration Manager process that sends client software metering data to the site server.

This action can be run on single or multi-selected devices, or with [a similar tool designed for device collections](#)

To run this tool:

1. Right-click on a device.
2. Select **Right Click Tools > Client Actions > Software Metering Usage Report Cycle**.

The window that opens displays progress and successful completion.

## Recast Permissions

Plugin	Permissions
ConfigMgrClient	SoftwareMeteringUsageReportCycle

## Microsoft Permissions

- Requires that the target device has a working ConfigMgr client installed.
- Requires that the user running the ConfigMgr console has administrative access to the remote device.
- [Remote WMI](#) ports must be allowed through the firewall.
- If the 'Ping Computer Before Running Tools' option is set, [ICMP Echo](#) must be allowed through the firewall.
- If using a Recast Management Server with a proxy, the service account will need administrator permissions on the remote device.

One way around some of the permissions requirements and firewall rules is installing [a Recast Agent](#).
