Recast
Change Cache Size

Last Modified on 12.22.25

The **Change Cache Size** tool allows a console user to view the current cache size and to enter a new one. This tool can be run on single devices, multi-selected devices, or with a similar tool designed to be run on a device collection

To run this tool:

1. Right-click on a device.

2. Select **Right Click Tools** > **Client Tools** > **Client Information**.

3. On the **Cache** tab, click **Change Cache Size**.

4. In the window that opens, enter the new cache size.

5. Click **Start** and confirm the change.
