

Refresh Updates Compliance State

Last Modified on 12.22.25

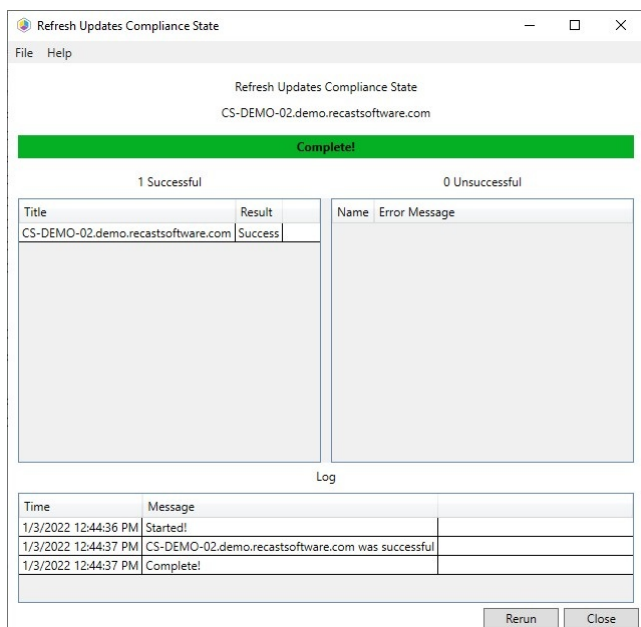

The **Refresh Updates Compliance State** tool allows a console user to refresh the update compliance state of a device in ConfigMgr. This tool can be run on single devices, multi-selected devices, or with a [similar tool designed to run on a device collection](#).

This tool uses [Remote WMI](#).

To run this tool:

1. Right-click on a device.
2. Select **Right Click Tools > Client Tools > Refresh Updates Compliance State**.

As the tool runs, the selected devices display according to status (successful/unsuccessful). Log messages are available at the bottom of the window.
