

Repair Client

Last Modified on 12.22.25

The **Repair Client** tool allows a console user to kick off the RepairClient functionality in the SMS_Client WMI class. This tool can be run on single devices, multi-selected devices, or with a [similar tool designed to run on a device collection](#)

This tool uses [remote WMI](#).

To run this tool:

1. Right-click on a device.
2. Select **Right Click Tools > Client Tools > Repair Client**.
3. Confirm that you want to repair the client.
