

Repair Client

The **Repair Client** tool allows a console user to kick off the RepairClient functionality in the SMS_Client WMI class. This tool can be run on single devices, multi-selected devices, or with a [similar tool designed to run on a device collection](#).

This tool uses [remote WMI](#).

To run this tool:

1. In your Configuration Manager console, right-click on a device.
2. Click **Right Click Tools > Client Tools > Repair Client**.
3. Confirm that you want to repair the client.

Recast Permissions

ConfigMgr Client	Repair Client Check
