Repair Client

Last Modified on 05.06.25

The **Repair Client** tool allows a console user to kick off the RepairClient functionality in the SMS_Client WMI class. This tool can be run on single devices, multi-selected devices, or with a similar tool designed to run on a device collection .

This tool uses remote WMI.

To run this tool:

1. Right-click on a device.

2. Select **Right Click Tools** > **Client Tools** > **Repair Client**.

3. Confirm that you want to repair the client.
