

Recast

Rerun Deployment

Last Modified on 12.22.25

The **Rerun Deployment** tool allows a console user to rerun a package or task sequence deployment on a device or multi-selected devices.

To run deployments that are not package or task sequence deployments, use [Remote Software Center](#).

This tool uses [Remote WMI](#).

To run this tool:

1. Right-click on a device.
2. Select **Right Click Tools > Client Tools > Rerun Deployment**.
3. Rerun a package or a task sequence by right-clicking on it.
