

# Run Client Check

Last Modified on 11.26.24

The **Run Client Check** tool runs the built-in ConfigMgr Client health checks.

To run this tool:

1. In your Configuration Manager console, right-click on a device.
2. Click **Right Click Tools > Client Tools > Run Client Check**.

Running the action kicks off the Client health checks automatically.

## Recast Permissions

ConfigMgrClient plugin	RunClientCheck permission
------------------------	---------------------------

## Microsoft Permissions

- This tool requires administrator permission on the remote device. If using Recast Management Server with a service account, the service account needs administrator permissions on the remote device.
- This tool requires remote WMI access.
