

Uninstall SCCM Client

Last Modified on 05.06.25

The **Uninstall SCCM Client** tool removes the Configuration Manager Client on a remote device.

This tool can be run on single or multi-selected devices, or with a [similar tool designed for device collections](#).

To run this tool:

1. Right-click on a device.
2. Select **Right Click Tools** > **Client Tools** > **Uninstall SCCM Client**.
3. Confirm that you want to uninstall the client.

NOTE: The tool does not currently monitor the status or success of the uninstall once begun.

Recast Permissions

ConfigMgrClient plugin	UninstallClient permission
------------------------	----------------------------

Microsoft Permissions

- Requires administrator permission on the remote device.
- If using a Recast Management Server with a proxy, the service account needs administrator permission on the remote device.
- This tool requires Remote WMI access.
