

Ping System(s)

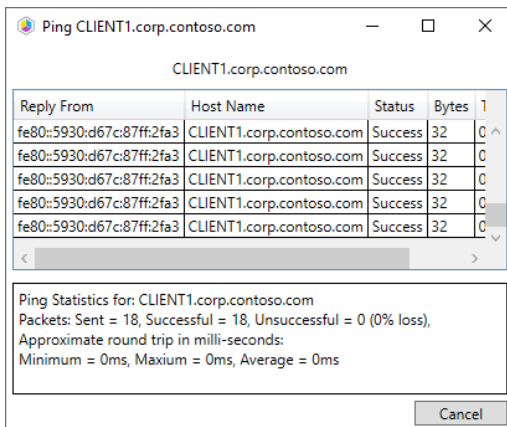

Last Modified on 11.26.24

The **Ping System(s)** tool sends an ICMP Echo request. This tool can be run on single devices and multi-selected devices.

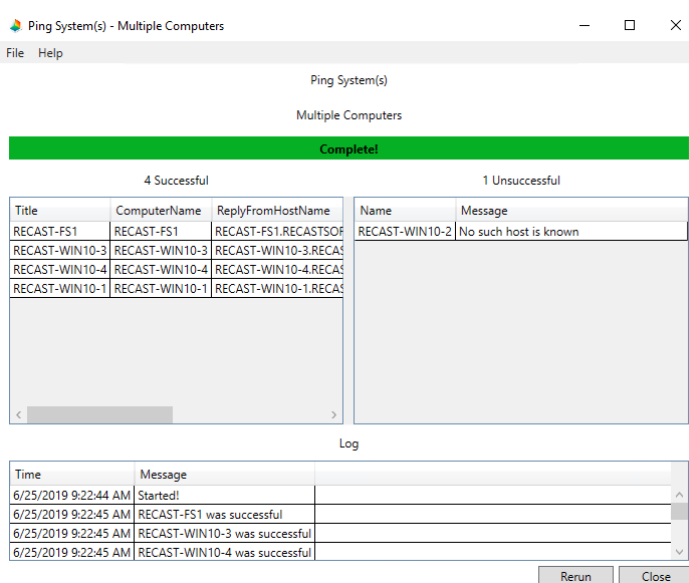

To run the tool:

1. In your Configuration Manager console, right-click on a device.
2. Click **Right Click Tools > Console Tools > Ping System(s)**.

Running the action on a single device opens the following window:

Running the action on multiple devices opens the **Multiple Computers** window:

Recast Permissions

Network plugin	PingComputer permission
