

Send Notification

Last Modified on 11.26.24

The **Send Notification** tool sends a custom notification to a device.

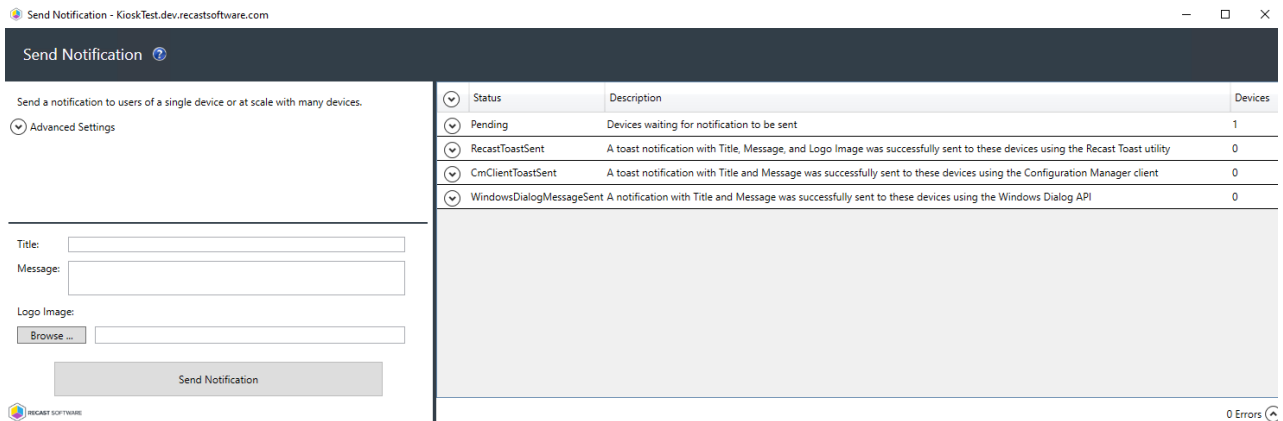

This tool can be run on single or multi-selected devices. A similar tool is designed for [device collections](#).

For a video walkthrough, see [Right Click Tools: Send Notification](#).

To run the tool:

1. In your Configuration Manager console, right-click on a device.
2. Click **Right Click Tools > Console Tools > Send Notification**.

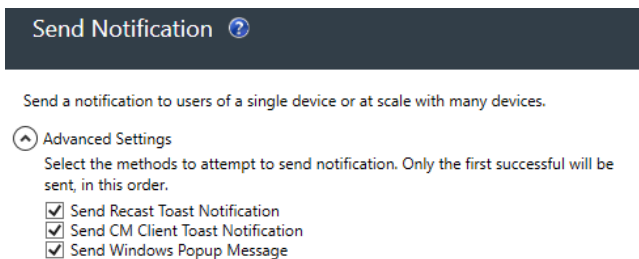

The **Send Notification** window will open.

3. Expand **Advanced Settings** to choose the type(s) of notification to send.

Three available methods: Recast Toast Notification, Configuration Manager Client Toast Notification, Windows Popup Message.

NOTE: The notification will only be sent using the first successful method.

4. Add a **Logo Image** in PNG, JPG, or BMP format to send with your Recast Toast notification (optional).
5. Click **Send Notification**.

Recast Permissions

SystemInformation plugin	SendRecastToastNotification permission
	SendMessageAllUsers permission
ConfigMgrClient plugin	SendCmClientToastNotification permission
