Send Notification

The **Send Notification** tool sends a custom notification to a device.
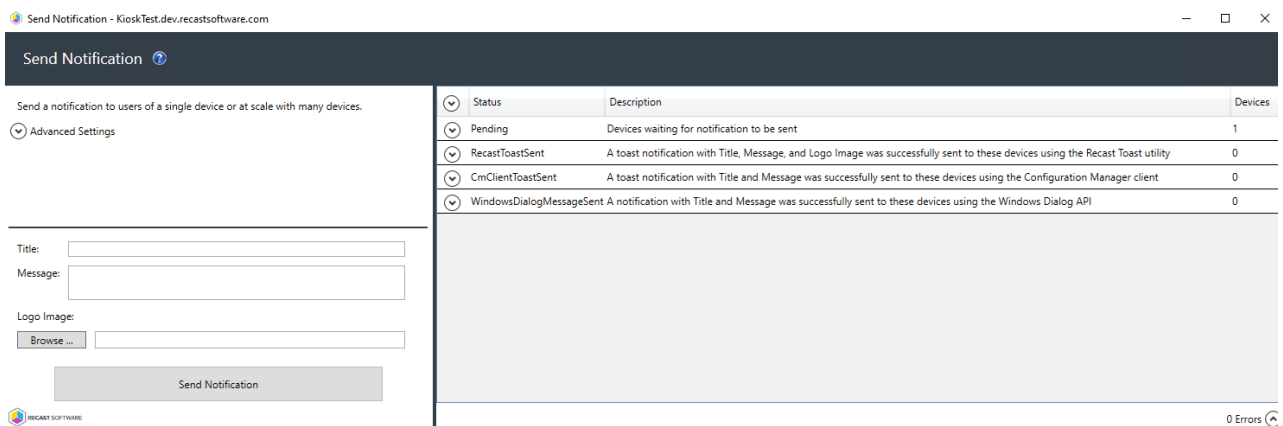

This tool can be run on single or multi-selected devices. A similar tool is designed for device collections.

For a video walkthrough, see Right Click Tools: Send Notification.

To run the tool:

1. In your Configuration Manager console, right-click on a device.

2. Click **Right Click Tools** > **Console Tools** > **Send Notification**.

The **Send Notification** window will open.

3. Expand **Advanced Settings** to choose the type(s) of notification to send.

Three available methods: Recast Toast Notification, Configuration Manager Client Toast Notification, Windows Popup Message.

NOTE: The notification will only be sent using the first successful method.

4. Add a **Logo Image** in PNG, JPG, or BMP format to send with your Recast Toast notification (optional).

5. Click **Send Notification**.
