

# Shutdown System(s)

Last Modified on 05.06.25

The **Shutdown System(s)** tool initiates a shutdown of selected systems. This tool can be run on single devices and multi-selected devices.

To run the tool:

1. Right-click on a device.
2. Select **Right Click Tools > Console Tools > Shutdown System(s)**.
3. In the **Shutdown / Restart Tool** window, choose to **Shutdown Device**, **Give user a prompt to cancel**, or **Skip Shutdown** when a user is logged in while attempting the shutdown action.
4. Set a delay in seconds before shutdown.
5. Customize the message to display prior to shutdown (optional).

The screenshot shows the 'Shutdown / Restart Tool' window. At the top, it says 'CLIENT1.corp.contoso.com'. Below that, there's a dropdown menu for 'If a user is logged into the computer:' with options: 'Shutdown Device', 'Give user a prompt to cancel', and 'Skip Shutdown'. There's a text input field for 'Delay (in seconds) before' and another for 'Message to display:' containing the text 'The system will shutdown in 30 seconds. Please save your work and log off.' At the bottom, there are 'Cancel' and 'Start' buttons, and a small 'By Recast Software' logo.

6. Click **Start** to initiate shutdown sequence.

## Recast Permissions

SystemInformation plugin	ShutdownComputer permission
