**RECAST** SOFTWARE

Shutdown System(s)

Last Modified on 11.26.24

The **Shutdown System(s)** tool initiates a shutdown of selected systems. This tool can be run on single devices and multi-selected devices.

To run the tool:

1. In your Configuration Manager console, right-click on a device.

2. Click **Right Click Tools** > **Console Tools** > **Shutdown System(s)**.

3. In the **Shutdown / Restart Tool** window, choose to **Shutdown Device**, **Give user a prompt to cancel** , or **Skip Shutdown** when a user is logged in while attempting the shutdown action.

4. Set a delay in seconds before shutdown.

5. Customize the message to display prior to shutdown (optional).

6. Click **Start** to initiate shutdown sequence.
