Software Metering Usage Report Cycle — Client Action on Collection

Last Modified on 12.22.25

The **Software Metering Usage Report Cycle** collects data for monitoring client software usage.

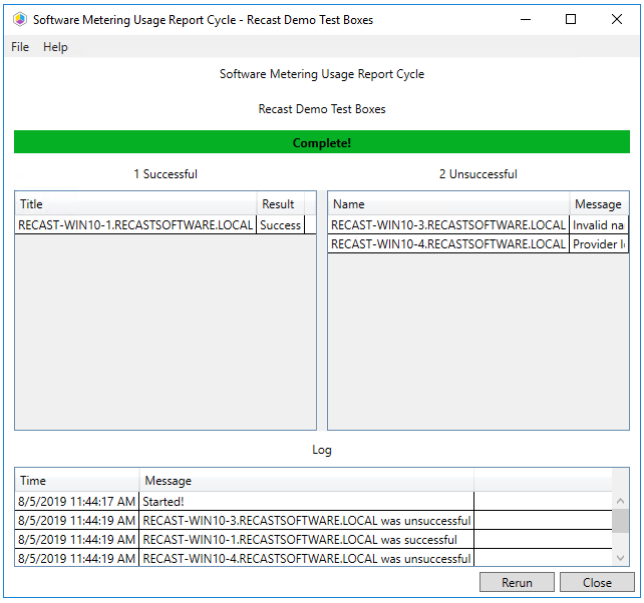
This action can be run on device collections, or with a similar tool designed for single and multi-selected tools

To run this tool:

1. Right-click on a device collection.

2. Select **Right Click Tools** > **Client Actions on Collection** > **Software Metering Usage Report Cycle**.

When the action runs, a window displays progress and completion according to success.



Recast Permissions

Plugin	Permissions
ConfigMgrClient	SoftwareMeteringUsageReportCycle

Microsoft Permissions

- Requires that the target device has a working ConfigMgr client installed.
- Requires that the user running the ConfigMgr console has administrative access to the remote device.
- Remote WMI ports must be allowed through the firewall.
- If the 'Ping Computer Before Running Tools' option is set, ICMP Echo must be allowed through the firewall.
- If using a Recast Management Server with a proxy, the service account will need administrator permissions on the remote device.

> One way around some of the permissions requirements and firewall rules is installing a Recast Agent.
