

Add Devices to Collection(s) — Client Tool on Collection

Last Modified on 12.22.25

The **Add Devices to Collection(s)** tool adds single or multi-selected devices to a specified device collection. Options are available for searching based on name rather than ResourceID.

This tool can be run on device collections, or with [asimilar tool designed for single and multi-selected tools](#)

NOTE: This tool makes a WMI API call to the SMS provider.

To run this tool:

1. Right-click on one or more device collections.
2. Select **Right Click Tools > Collection Tools > Add Devices to Collection(s)**.
3. In the window that opens, specify devices to add in the **Computer List** and click **Start**.
