

# Add Devices to Collection(s) — Client Tool on Collection

Last Modified on 06.20.23

The **Add Devices to Collection(s)** tool adds single or multi-selected devices to a specified device collection. Options are available for searching based on name rather than ResourceID.

This tool can be run on device collections, or with a [similar tool designed for single and multi-selected tools](#).

**NOTE:** This tool makes a WMI API call to the SMS provider.

To run this tool:

1. In your Configuration Manager console, right-click on a device collection.
2. Click **Right Click Tools > Collection Tools > Add Devices to Collection(s)**.
3. In the window that opens, specify devices to add and click **Start**.

## Recast Permissions

ConfigMgr Server	Get All Device Collections
ConfigMgr Server	Add Devices to Collection

## Microsoft Permissions

- Requires that the user running the tools has sufficient ConfigMgr permissions to add the device to the collection.
- If a Recast Management Server is being used with a proxy, the service account also needs these permissions.
