

Change Cache Size — Client Tool on Collection

Last Modified on 12.22.25

The **Change Cache Size** tool allows a console user to view the current cache size and to enter a new one.

This tool can be run on device collections, or with [asimilar tool](#) designed for [single](#) and [multi-selected](#) tools

To run this tool:

1. Right-click on a device collection.
2. Select **Right Click Tools > Client Tools on Collection > Client Information**.
3. On the **Cache** tab, click **Change Cache Size**.
4. In the window that opens, enter the new cache size.
5. Click **Start** and confirm the change.
