Change Cache Size — Client Tool on Collection

Last Modified on 06.20.23

The **Change Cache Size** tool allows a console user to view the current cache size and to enter a new one.

This tool can be run on device collections, or with a similar tool designed for single and multi-selected tools .

To run this tool:

1. In your Configuration Manager console, right-click on a device collection.

2. Click **Right Click Tools** > **Client Tools on Collection** > **Client Information**.

3. On the **Cache** tab, click **Change Cache Size**.

4. In the window that opens, enter the new cache size.

5. Click **Start** and confirm the change.

Recast Permissions

ConfigMgr Client	Change Cache Size

Microsoft Permissions

- Requires Administrator permissions on the remote device.
- If a Recast Management Server is being used with a proxy, that service account also needs admin permission on the remote device.
- This action requires Remote WMI access.
