

Remove Devices from Collection(s) — Client Tool on Collection

Last Modified on 06.20.23

The **Remove Devices from Collection(s)** tool removes a group of computers from a specific collection.

To run the tool:

1. In your Configuration Manager console, right-click on a device collection.
2. Click **Right Click Tools > Collection Tools > Remove Devices from Collection(s)**.
3. In the window that opens, choose the devices to remove and click **Start**.

Recast Permissions

ConfigMgr Server	RemoveDevicesfromCollection
------------------	-----------------------------

Microsoft Permissions

- Requires administrator permission on the remote device.
- If using a Recast Management Server with a proxy, the service account needs administrator permission on the remote device.
- This tool requires Remote WMI access.
