

Repair Client — Client Tool on Collection

The **Repair Client** tool kicks off the Repair Client functionality in the SMS_Client WMI class.

This tool can be run on device collections, or with a [similar tool designed for single and multi-selected tools](#).

To run the tool:

1. In your Configuration Manager console, right-click on a device collection.
2. Click **Right Click Tools > Client Tools on Collection > Repair Client**.
3. Confirm that you want to repair the client.
