Uninstall SCCM Client — Client Tool on Collection

The **Uninstall SCCM Client** tool removes the ConfigMgr Client on a remote device.

This tool can be run on device collections, or with a similar tool designed for single and multi-selected tools .

To run the tool:

1. In your Configuration Manager console, right-click on a device collection.

2. Click **Right Click Tools** > **Client Tools on Collection** > **Uninstall SCCM Client**.

> **NOTE**: The tool does not currently monitor the status or success of the uninstall once begun.

Recast Permissions

ConfigMgr	UninstallClient

Microsoft Permissions

- Requires administrator permission on the remote device.
- If using a Recast Management Server with a proxy, the service account needs administrator permission on the remote device.
- This tool requires remote WMI access.
