

# Group Policy Update — Console Tool on Collection

Last Modified on 05.06.25

The **Group Policy Update** tool forces an update to a computer policy, user policy, or both.

If you choose to update a user policy, the user will temporarily see a command prompt while the policy is updating.

To run the tool:

1. Right-click on a device collection.
2. Select **Right Click Tools** > **Console Tools on Collection** > **Group Policy Update**.
3. In the window that opens, select **Update Machine Policy** and/ or **Update User Policy** and click **Start**.

## Recast Permissions

SystemInformation plugin	GroupPolicyUpdate permission
--------------------------	------------------------------

## Microsoft Permissions

- The user running this action will need to be an administrator of the remote device.
- If using a Recast Server with a service account, the service account will need to be an administrator of the remote device.
- This tool relies on [remote WMI](#) to start the Group Policy Update process.
