

Recast Runner

Last Modified on 07.06.23

Recast Runner executes actions created with [Recast Builder](#). Builder actions can only be run with the user account accessing the Configuration Manager console or by routing over the Recast Proxy service account.

To execute a Builder Action with Recast Runner:

1. Right-click in your Configuration Manager console and select **Recast Automation > Recast Runner**.
2. In the **RCT Runner - Run Action** dialog, select an action and click **Next**.
3. Choose to run the action immediately or according to a schedule and click **Finish**.
