RECAST SOFTWARE

About Recast Management Server

The Recast Management Server (RMS) is the primary component in Recast's on-premises infrastructure, and the hub for our entire product suite. Installing Recast Management Server software gives you a central location to configure and monitor all the Recast applications and components in your deployment.

RMS Features

For Right Click Tools Enterprise:

- Role-based permissions that use Active Directory users and/or groups to grant or limit access to specific Right Click Tools
- Advanced audit logging that that allows administrators to see which actions were run and which users initiated the actions
- Scheduling of certain Right Click Tools actions and Recast Builder actions
- Use of Recast Proxy to run actions against computers using a service account
- Use of Recast Agent to run actions against computers in untrusted domains, workgroups, or over the ConfigMgr Cloud Managed Gateway
- Access to four web dashboards

For Endpoint Insights:

The Recast Management Server enables the collection of warranty information.

For Privilege Manager:

Starting with Recast Software Version 5.0, Privilege Manager is integrated into Recast Management Server.

For Application Manager:

Starting with Recast Software Version 5.4, Application Manager is integrated into Recast Management Server.

Recast Management Server and Component Requirements

Many Recast Software features require the installation of Recast Management Server, Recast Proxy and/or Recast Agent. Unless otherwise noted, a checkmark (✔) indicates that a Recast component must be installed to fully enable product features and functionality.

	RMS	Recast Proxy	Recast Agent

	RMS	Recast Proxy	Recast Agent
Right Click Tools	✔	✔	✔
Role-based Administration	✔		
Advanced Logging	✔		
Web Dashboards	✔	✔	
Kiosk Management	✔♦	✔	
Recast Automation	✔♦	✔	
Endpoint Insights	✔♦	✔	✔
Privilege Manager	✔	✔♦	✔
Application Manager	✔	✔	

♦ Kiosk Manager and Workflow Automation require RMS to schedule actions.

♦ Endpoint Insights requires RMS to collect warranty information.

♦ Privilege Manager requires a Recast Proxy to use AD or Entra ID objects to target rules.
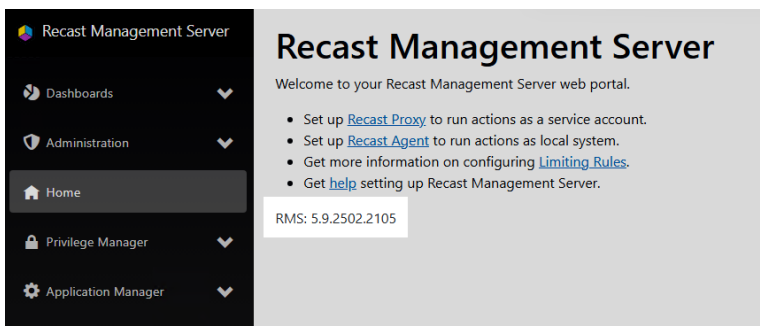

Install Recast Management Server

See Recast Management Server Installation .

Access Recast Management Server

Your Recast Management Server can be accessed by navigating to `https://<ServerFQDN>:<Port>` in a web browser.

Check Recast Management Server Version

You'll find your RMS software version on the Recast Management Server homepage.
