

BitLocker Web Dashboard

Last Modified on 12.16.24

The **BitLocker Web Dashboard** scans Active Directory, Configuration Manager, and MBAM for BitLocker compliance information. This dashboard requires a [service connection](#) to each third-party product you want to scan (AD, ConfigMgr, MBAM).

Common Use Cases

- Identifying computers without stored recovery keys
- Identifying computers with no encryption or incorrect encryption
- Monitoring recovery key location changes during a migration

Run a BitLocker Scan

To scan devices for BitLocker compliance:

1. In your Recast Management Server, navigate to **Dashboards > BitLocker**.
2. On the **BitLocker** page, click **Select Service Connections** to choose service connections to include in the scan.
3. In the side panel that opens, select objects in Active Directory and Configuration Manager.
4. Ensure that at least one MBAM service connection is selected to run MBAM actions.
5. Click **Save & Run Scan**.

Edit Configuration Filters

After a scan runs, you can click **Edit** to change the service connections included in the scan.

Create a Snapshot

Take a snapshot of the dashboard to capture the state of your system at a single point in time.

To create a snapshot:

After a scan runs, click **Create Snapshot**.

Create a Trend

Schedule regular snapshots to view BitLocker compliance over a set period of time. See [BitLocker Web Dashboard Trend](#).

BitLocker Charts

BitLocker Recovery Key Storage: Displays devices according to where recovery keys are stored (AD, ConfigMgr, MBAM).

Also displays devices without stored keys.

Unified Compliance: Displays devices according to compliance in the ConfigMgr database, the MBAM database, or both.

Click on a segment of the chart or legend to view details in the table.

NOTE: Devices may be non-compliant due to a lack of encryption or because they were encrypted using the wrong method.

BitLocker Tabs

Tabbed views offer additional information about the devices in each category. There are also options to **Export to CSV** and to **Expand to Full Screen**.
