## **Server Migration**

Last Modified on 06.21.23

Instructions for migrating your Recast Management Server database to a new server.

To migrate the RecastManagementServer database:

1. Back up your RecastManagementServer database.

2. Copy the database over to the new location.

3. Navigate to C:\Program Files (x86)\Recast Software\Recast Management Server on your management server and open the **appsettings.Production.json** file.

4. Update your server information in the .json file to specify the new server name.

{		
	"ConnectionStrings": {	
	"DefaultConnection":	"Server=localhost;Database=RecastManagementServer;Trusted Connection=True;MultipleActiveResultSets=true"
	}	
}	-	

5. Open IIS Manager, under Manage Website, click to Restart your Recast Management Server website.
