

SSRS Retrieving Data from Incorrect Source

Last Modified on 12.02.25

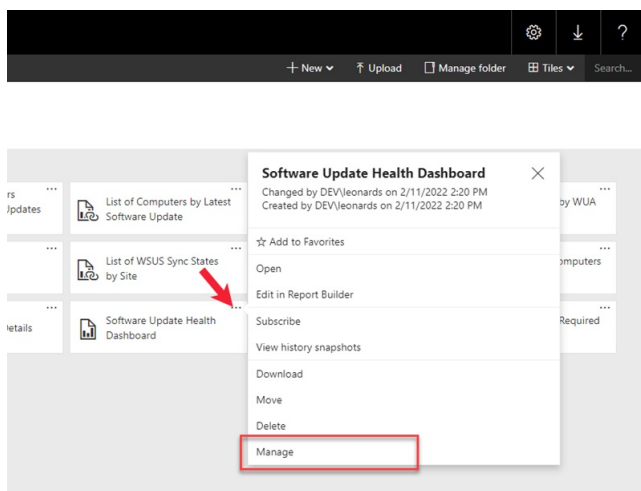

You can upload a .RDL file so that your SSRS report will run and retrieve data from the correct data source.

To upload a .RDL file:

1. Download the file on your local machine.
2. Navigate to the folder on Reporting Point (RP) Endpoint Insights > Security > Software Updates Health Dashboard

3. Delete and replace the report from the folder, or simply upload thenew .RDL file which will replace the existing file from the folder.
4. Once the upload completes, click on the ellipsis (...) next to the report title.
5. In the window that opens, click **Manage**.

6. On the **Data sources** tab, select the appropriate **shared data source** from the list and click **Save**.

Manage Software Update Health Dashboard

[Home](#) > [ConfigMgr_DEV](#) > [Endpoint Insights](#) > [Security](#) > [Software Updates](#) > [Software Update Health Dashboard](#) > [Manage](#) > [Data sources](#)
