

Enable .NET Framework

Last Modified on 11.29.24

You can manually enable .NET version 8 via Server Manager.

- To enable the required .NET framework:
- 1. Open Server Manager and navigate to Manage > Add Roles and Features.

2. When the Add Roles and Features Wizard opens, click Next.

3. Select Role-based or feature-based installation and click Next.

4. Select your destination server and click **Next**.
