## Recast Proxy Fails to Populate in Recast Management Server

Last Modified on 06.16.23

If the Recast Proxy fails to populate in Recast Management Server, the agent.sqlite file has most likely been corrupted.

## Resolution

To recreate the agent.sqlite file:

1. Open Services.

## 2. Stop the **Recast Proxy Service**.

🖏 Performance Logs & /	Start	and Ale
Phone Service	Stop 🗲	hony st
Plug and Play	Pause	r to rec
Portable Device Enum Over Power	Resume	icy for licy an
Rrint Spooler	Restart	print jc
Rinter Extensions and	All Tasks	custorr
PrintWorkflow_a376cc	D. ( )	
Problem Reports and	Refresh	es supp
Program Compatibilit	Properties	es supp
Quality Windows Aud		udio V
🔍 Radio Management S	Help	t and A
🐘 Recast Proxy Service 👘	Runs Recast actio	ns

3. Delete the **agent.sqlite** or **RecastProxy.sqlite** (version 5.x) file from **C:\Users\<Proxy Username>\AppData\Roaming\Recast Software\Recast Proxy**.

	C:\Users\LabAdmin\AppData\Roaming\Recast Software\Recast Proxy						
	*	^	Name	Date modified	Туре	Size	
ls	*	i.	🗋 agent.sqlite 🗡	3/10/2022 4:23 PM	SQLITE File	20 KB	
its	*						

4. Start the Recast Proxy Service (This will recreate the agent.sqlite or RecastProxy.sqlite file).

Start <table-cell-columns></table-cell-columns>		
Stop		
Pause		
		Resume
Restart		
All Tasks >		
All Tasks /		
Refresh Properties		
		Help

5. Confirm the proxy populates and shows as **Connected** and **Authorized** on the Recast Proxies page in Recast Management Server.
