

# Computer BIOS Details

Last Modified on 03.31.23

The Computer BIOS Details dashboard provides you with all of the BIOS settings for a given computer along with any BIOS upgrade details.

**NOTE:** The manufacturer information displayed at the top of the page is based on the computer system details, whereas, the manufacturer information found in the lower cards is based on the BIOS details. In many cases this information is the same, however, it might not be true in all instances. This is why the manufacturer details are listed twice.
