# Load Licenses

Last Modified on 10.24.23

After installing Privilege Manager, you'll need to upload the server license before uploading client access licenses. You only need to upload the server license once.

## Server License

To load the server license:

1. On the **Licenses** page, click **Load server license** in the navigation panel.

2. Specify the server license file to load.

3. Click **Load license**.

## Client Access Licenses

To load client access licenses:

1. In the Client Access Licenses section on the **Licenses** page, click **Load License.**

2. Specify the CAL license file to load.

3. Click **Load license**.
