

# Privilege Manager Legacy Portal Configuration

Last Modified on 08.08.25

On the **Configuration** pages you can create rules to manage local groups and users.

- **Managed Groups:** Create rules for managing local groups on Privilege Manager Clients to any management level.
- **Managed Users:** Create rules for managing local users on Privilege Manager Clients to any management level.
- **Local Groups:** Specify local groups in your environment to manage on your Privilege Manager Clients. Select from a predefined list of groups or create a local group that can then be managed with a rule.
- **Local Users:** Specify local users in your environment to manage using your Privilege Manager Clients. Select from a predefined list of users or create a local user account that can then be managed with a rule.
