

Client Components

Last Modified on 11.15.22

To install Privilege Manager client components, extract installation media to a local folder on the server. Start the installation using a user account with administrative permissions on the computer.

Install the client components in the following order:

1. Microsoft Visual C++ 2012 x64 Minimum Runtime 11.0.61030
2. [Recast Agent](#)
3. [Privilege Manager Client](#)

NOTE: Client components require .NET Framework 4.x version to be installed on the computer.
