

## Right Click Tools Shows Community After an Enterprise License is Applied

Last Modified on 12.02.25

### Likely Cause

If Right Click Tools shows as the Community Edition after applying an Enterprise license, there are likely multiple license files in `C:\ProgramData\Recast Software\Licenses` that are conflicting with one another.

### Resolution

1. Close the Configuration Manager console.
  2. Delete all license files from `C:\ProgramData\Recast Software\Licenses` and `%appdata%\Recast Software\Licenses`.
  3. Copy your most recent license file over to `C:\ProgramData\Recast Software\Licenses`.
  4. Relaunch the console.
