

RECAST SOFTWARE

RMS Permissions Overview

Last Modified on 07.19.24

The **Permissions** page displays all Recast users and roles. On this page, you can add Active Directory users or groups and then assign them specific roles that grant a set of permissions.

To view the permissions associated with a role, click **Permissions** to the right of the role.

For product-specific information, see our articles on configuring permissions for [Right Click Tools](#), [Endpoint Insights](#) and [Privilege Manager](#).
