

## Remote Software Center

Last Modified on 01.06.26

The **Remote Software Center** has similar functionality as the local Software Center application but can be run remotely and at scale on devices or device collections. You can view and install deployed applications and programs, available software updates, and view and run deployed task sequences. It has similar functionality to the local Configuration Manager control panel for checking the target machine against deployed compliance policies.

To locate the Remote Software Center:

1. In your Configuration Manager console, right-click on a device or device collection.
2. Click **Right Click Tools > Client Tools > Remote Software Center**.

To learn more, see [Remote Application Install](#) on the Recast Software YouTube channel.

InstalledSoftware	ListSoftware UninstallSoftware
Network	PingComputer
SystemInformation	GetLoggedInUsers ReadOnly

# Recast

Plugin	Permissions
WMI	InvokeMethod ReadOnly

NOTE: To make changes on the populated tabs (for example, to install applications), you may require additional permissions.

## Microsoft Permissions

- Requires that the user be a local administrator on the remote device(s). This can be done using a [Recast Proxy](#), a [Recast Agent](#) or by granting the required [user permissions](#).
- Requires a [Recast Agent](#) for workgroup computers, or to run actions over the Cloud Management Gateway.
- Requires [remote WMI](#) to populate its contents and run actions.

## Applications

The **Remote Software Center – Applications** tab displays applications deployed to devices selected in the Configuration Manager console. The table includes details about the **Publisher**, **Version**, **Install State**, and the number of **Devices** on which the application is installed.

You can filter the applications by devices or users, and sort information by clicking any column header. Expand a table row to display details about the devices on which the application is deployed. For each device, the table shows the install **Status** of the application, when it was **Last Evaluated** and **Last Run**, and any **Error Code**.

Name	Publisher	Version	Install State	Devices
MBAM Client September 2017 Update	Microsoft	2.5.113.0	1 / 1 installed	1
Explorer++		1.3.5	1 / 1 installed	1
CMTrace			1 / 1 installed	1
Local Administrator Password Solution	Microsoft		1 / 1 installed	1
Configuration Manager Client Upgrade Package	Microsoft Corporation			1

## Software Updates

The **Remote Software Center – Software Updates** tab shows software updates available for your devices. You can select individual updates to install or choose to install all missing updates. If multiple devices are selected when opening the Remote Software Center, the updates will start on all selected devices.

Click the caret to the left of each software update to display the **Compliance State** and **Evaluation State**, as well as the **Percent Complete** and the **Error Code** of any attempted update that has failed.

# Recast

<input type="checkbox"/>	Name	KB Article	Publisher	Devices
<input type="checkbox"/>	Definition Update for Windows Defender Antivirus - KB2267602 (Definition 1.267.1675.0)	<a href="#">2267602</a>	Microsoft	1
<input type="checkbox"/>	Definition Update for Windows Defender Antivirus - KB2267602 (Definition 1.273.848.0)	<a href="#">2267602</a>	Microsoft	1
<input type="checkbox"/>	2020-02 Cumulative Update for .NET Framework 4.8 for Windows 10 Version 1803 for x64 (KB4537479)	<a href="#">4537479</a>	Microsoft	1
<input type="checkbox"/>	2020-01 Update for Windows 10 Version 1803 for x64-based Systems (KB4494451)	<a href="#">4494451</a>	Microsoft	1

To install missing software updates, select the desired updates and click **Install**.

After kicking off the remote install, the tool displays progress (of the kick-off, not the installation itself). Devices are sorted according to success.

## Recast Permissions

ConfigMgrClient plugin	InstallSoftwareUpdates permission
------------------------	-----------------------------------

## Microsoft Permissions

- This tool requires administrator permission on the remote device.
- If using Recast Management Server with a service account, the service account needs administrator permissions on the remote device.
- This tool uses remote WMI.

## Task Sequences

On the **Remote Software Center – Task Sequences** tab, you can view and start task sequences available for your devices.

Click on a task sequence to start it. If multiple devices are selected when opening the Remote Software Center, the task sequences will start on all selected devices.

<input type="checkbox"/>	Name	Devices
<input type="checkbox"/>	Upgrade Windows to 20H2 (Do Not Run) 1	

## Compliance

# Recast

On the **Remote Software Center – Compliance** tab, you can view and evaluate compliance policies available for your devices.

Select a compliance policy and click **Evaluate** to start it. If multiple devices are selected when opening the Remote Software Center, the policy will start on all selected devices.

The screenshot shows the Recast Remote Software Center interface. On the left is a sidebar with four menu items: Applications, Software Updates, Task Sequences, and Compliance. The Compliance menu item is highlighted with a blue background. The main area on the right contains a search bar at the top with 'Refresh' and 'Evaluate' buttons. Below the search bar is a table with columns: Name, Compliance, and Devices. The table has one row with a dropdown arrow, a checkbox, and the text 'Recast Demo Exploit Guard 1 / 1 compliant 1'. Below the table is a large empty gray area. At the bottom left is the Recast Software logo, and at the bottom right is a status bar showing '0 Errors' with a dropdown arrow.

	Name	Compliance	Devices
▼	<input type="checkbox"/>	Recast Demo Exploit Guard 1 / 1 compliant 1	

0 Errors
