Recast

Count of Computers by Warranty Range

Last Modified on 11.18.25

The **Count of Computers by Warranty Range** displays computers that are under warranty, nearing warranty expiry, or out of warranty by date ranges (in days and years).

NOTE: If a computer is marked as 'Pending Service', it is currently in a 10-day delay period after which the warranty information becomes available. In the meantime, use the BIOS Date. You can also shorten the delay period by installing the Recast Agent on the devices and initiating a hardware inventory cycle.

This report drills through to:

↓

List of Computers by Warranty Range: Shows computers within a specific warranty range.
Select **All Expired Computers** to see all computers that are out of warranty.

↓

Computer Warranty Information: Shows details about a specific computer, including its manufacturer, model, and serial number. Includes warranty details for computer hardware and software.
