

## Assign a Right Click Tools Role

Last Modified on 03.30.26

You can grant an Active Directory user or user group Recast permissions by assigning a specific role, such as an Administrator role. Right Click Tools Enterprise must be connected to a Recast Management Server to set up role-based permissions.

### ROLE NOTES:

- When a user is assigned multiple roles, their permissions for each role are aggregated
- A user's role is also constrained by any [user](#) or [group limiting rules](#) that are applied

### Add an Active Directory User or User Group

To add an AD user or user group:

1. In your Recast Management Server, navigate to **Administration** > **Permissions**.
2. In the Recast Users section, click **Add User** or **Add Group**.

Name	Identifier	Is Group	Actions
Administrators	S-1-5-21-600214008-206214008-1207122508-4752	True	 
Gwen Stacy	S-1-5-21-600214008-206214008-1207122508-4752	False	 

3. In the window that opens, search for your AD name or AD user group and click the **Add** button.

**NOTE:** By default, the search is limited to the users or groups in the same domain as your Recast Management Server.

#### Use a wildcard (\*) to facilitate your search

Wildcard examples:

**John Connor** returns strings that match exactly

**John C\*** returns strings beginning with 'John C', such as 'John Connor', 'John Connors', and 'John Cranston'

**\*Connor** returns strings ending with 'Connor', such as 'John Connor' and 'Carol O'Connor'

**\*Support\*** returns strings that include 'Support' plus whatever is on the left and right, such as 'Customer Support Team' and 'Enterprise Support Group'

### Assign a User a Role

Each user must be assigned at least one role.

To assign a user a role:

1. On the **Permissions** page, click the Edit icon to the right of the user or group.

# Recast

Recast Users				
Name	Identifier	Is Group	Actions	
Administrators	3-1-5-21-405874458-596216019-1247321128-1153	True	 	
Gwen Stacy	3-1-5-21-405874458-596216019-1247321128-1153	False	 	

2. In the **Role Assignments** window that opens, under **Roles**, select a role to assign to the user/group.

To learn about the individual permissions granted by a role, see [View or Edit User Role Permissions](#).

3. Under **Assigned Roles**, enable **Limit this user to specific objects** and select a **Service Connection** to add a limiting rule that restricts user permissions to a set of devices (optional). To learn more, see [Limiting Rules](#).

#### Assigned Roles

**LAPS**  Limit this user to specific objects:

**Service Connection:**  
Choose a service connection

**Save**

4. Click **Save**.

**NOTE:** Beginning with [Recast Software Version 5.9.2502.2105](#), you no longer have to set a **Refresh Interval** to repopulate your limiting rules (formerly known as scopes). The scheduled **Discovery Sync** will keep your service connection data up to date.
