Application Manager for MECM Overview Tab
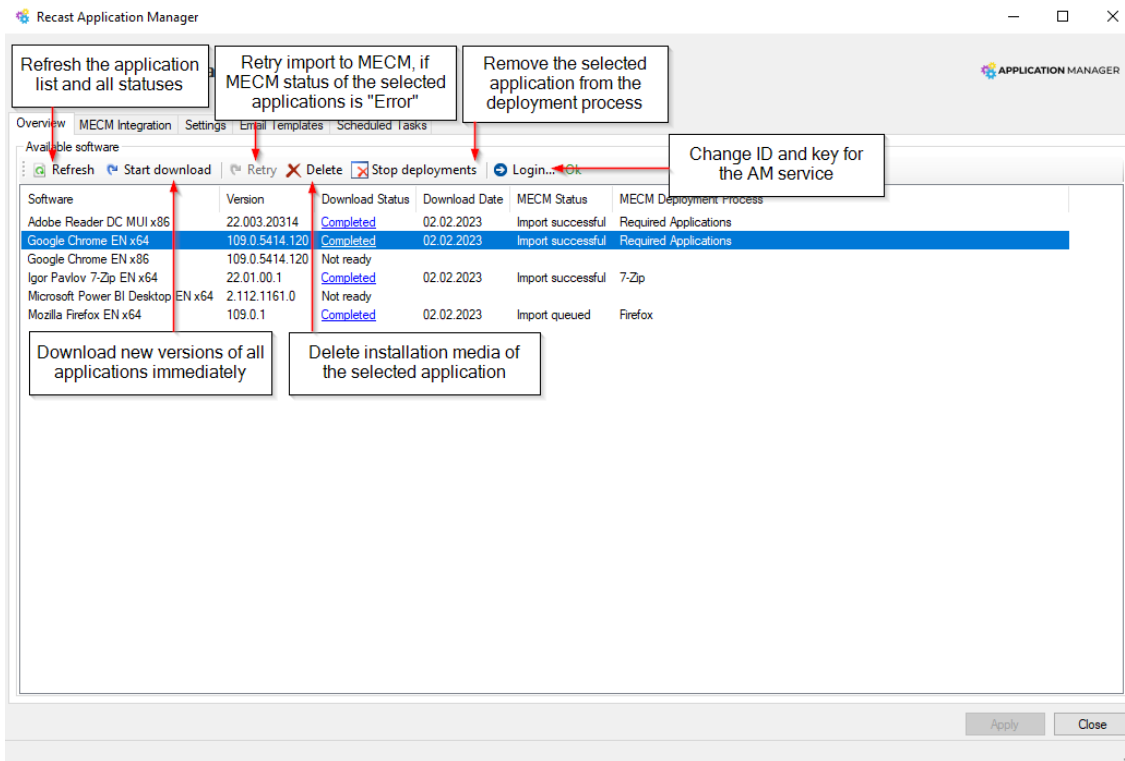

The **Overview** tab offers a summary of your Application Manager installation. It includes a list of applications you have selected for your AM service.

The application list includes:

- **Software** name

- Latest **Version** of the application

- **Download Status:** 'Completed' status links to the folder containing the application's installation files

- **Download Date** for the latest application version

- **MECM Status** (visible for MECM integration only)

    - **Empty** - Application is not in any deployment process

    - **Error** - Application couldn't be imported into MECM

    - **Import queued** - Application is being imported into MECM

    - **Import successful** - Application is successfully imported to MECM and is deployed as configured in the deployment process

- **MECM Deployment Process** (visible for MECM integration only): Deployment process to which the application has been added
