

## Update Application Manager for MECM

Last Modified on 04.11.24

You can update Application Manager by downloading the latest installer from Application Manager portal:

- 1. Sign in to Application Manager portal and navigate to Services -> AM for MECM -> Downloads page
- 2. Select **Download** and save the installer on the server where AM is installed
- 3. Run the msi installer and follow on screen instructions
- 4. Launch Application Manager and update configurations by clicking **Yes**, if prompted

Update configuration?		$\times$
?	There are new MECM settings available. Would you like to configure them automatically? This will backup old configuration to a file named sccm.xml.old	
	Yes No
